

# BOOST AND A Makeover

**Now that the mission's accomplished, what's next for Hahn and the 'Boosta'?**

"I'm trying not to get too attached to the bike. I've had more fun with this project than anything I've done in years. The way everyone pulled together to help is humbling, and I can't thank everyone enough. The bike itself is a perfect mix of pure power and real street performance. I'd have to think twice before modifying it any further. However, my buds keep blowing in my ear about this Prostar class called Super Street." **ZWT**
