MSRP \$995.99

BSR- PPC Handheld Tuner

***Available now for Pontiac Solstice GXP
and Saturn Sky Redline***

(Also available for late model Volvo & SAAB factory turbo models)

PPC® - the optimal OBD tuning system

Unique tuning technology developed by Swedish high-tech company BSR

The PPC® is supplied with a highly developed and sophisticated tuning program from BSR

The PPC® Tuning System is easily installed and will after a few minutes be provided with a tuning program via the car's diagnostic port. If the need to reverse the programming exists, the original can be recalled just as fast.

For reasons of security, the PPC® unit has been designed so that it "marries" itself to the car to which it is first connected.

The price for the PPC unit, including the tuning program and free Internet updates. Updates can be done via Internet...

BSR AB continuously develops PPC for new car models and engine management systems as they became available.

Once purchased, the PPC® unit is the property of the customer.

DISCLAIMER: BSR AB is not making any representation, nor are we in any way affiliated with car manufacturers mentioned.
